

Global Colocation Provider

Established 1998

SAS 70 Certified

www.uscolo.com
sales@uscolo.com

U.S. Colo provides colocation facilities in the heart of the telecom corridors in downtown Los Angeles and Seattle, where over 200 carriers are located — including AT&T, Global Crossing, Level 3, Qwest, Sprint, Verizon, XO Communications and others.

- WE FEATURE**
- SAS 70 certification
 - Redundant paths from multiple carriers/providers
 - Cross-connections completed within hours (if carriers are prepared)
 - Carrier-neutral facility
 - "Remote hands" support and free reboots/restarts
 - All facilities are staffed/monitored and accessible to customers 24/7/365
 - AC and DC power plants backed-up by UPS, generators and batteries
 - Air conditioning and fire suppression systems built to industry standards
 - AC power — multiple phases/voltages available
 - Result — 99.999% uptime

HISTORY

Since being founded in 1998, U.S. Colo has focused on its core business of providing colocation space, cross-connections and bandwidth to demanding customers from over two dozen countries.

TECHNICAL STAFF

Our 24/7/365 staff is certified to work on Cisco, Brocade and many other types of hardware and software. We have more technical support resources than all other Los Angeles colocation centers combined.

CUSTOMERS

Besides the many established international businesses, carriers and providers we host, U.S. Colo is the leading colocation provider for start-up customers. We support the unique needs of growing companies, understanding that we have a vested interest in their success.

MANAGEMENT

The company is under the management of co-founder and president, Navroz Haji, with the support of partners Rick Fisher and Max McCombs.

U.S. Colo provides more than just a secure space. We can cross-connect customers to multiple carriers/providers within hours. Our ideal locations in and around the One Wilshire building in downtown Los Angeles means that we occupy some of the most wired territory on earth.

FROM OUR CUSTOMERS

"When you absolutely need to have something fixed at 3 o'clock in the morning, this is the only company to use."

— A.H., Los Angeles

"Their dedication to work throughout the night and over the weekend to ensure our circuits were cabled, tested and commissioned was very surprising and refreshing for a data centre provider today."

— M. T., Kuala Lumpur

"I am thankful to Haji and his team who have helped me to grow from a 1/3rd rack unit business to a fully loaded 3 rack cage within one year."

— P.S., Mumbai
